Total turnover of Rs.6.548 million is composed of exports including rebate comparing to total turnover of Rs.18.610 million during the corresponding period last year. The cost of sales has substantially reduced from 87.86% to 72.92%.

During the period under review, there was no local sales and the production for the export orders was done under toll manufacturing arrangement. This resulted in the saving of manufacturing expenses which used to remain under absorbed in the previous self-manufacturing scenario. Company ended up with loss of Rs. (2.361) million comparing with Rs (1.509) million. The loss per share remained to Rs. (0.69) comparing with loss per share of Rs. (0.44) for the same period last year.

Your directors are busy to implement the members' decisions made in the last annual general meeting. Major part of the decisions has been implemented. Accordingly, after disposing of the plant and machinery, toll manufacturing has been arranged, resulting the saving in manufacturing expenses. Similarly, negotiations are under way to rent out the building on good terms to continue a regular source of income of the Company.

#### **FUTURE OUTLOOK:**

In view of uncertain international geo-political conditions including ongoing Russia-Ukraine war, invasion by Israel in Gazastrip and other areas of Middle East, our estimates are not optimistic. Moreover, tension on the two sides of Pakistan's border is itself a major reason of slow economy in the Country
